EDUCATION

New York University | 3.93/4.0 GPA

Graduation: May 2026

B.S. Computer Science, Minor in Mathematics

New York, NY

- GLASS Scholar (22 selected), awarded \$10K/year for global-impact research projects
- Courses: OOP, OS, Algorithms II, Algorithmic Machine Learning and Data Science

EXPERIENCE

Research Assistant – Prof. Lisa Hellerstein

January 2025 – Present

Theoretical Computer Science Group

New York, NY

- Researching stochastic boolean function evaluation for the representation problem
- Applying approximation techniques including dual greedy, linear programming, round robin scheduling, and latency based arguments

Cisco Systems, Inc

May 2024 - August 2024

Software Engineer I Intern

San Jose, CA

- Developed APIs using FastAPI, MongoDB, and Elasticsearch to query crash data, performance metrics, and hardware fixes for products sold to customer companies
- Designed a caching workflow for query results, integrating with Cisco's internal Download API to make risk mitigation data accessible across teams
- Achieved comprehensive test coverage using pytest

NYU: Data Structures and Algorithms TA, OOP TA

February 2023 - December 2024

Teaching Assistant

New York, NY

- Guided 40 students in utilizing data structures and improving their proficiency in algorithms
- Instruct students on the principles of OOP and guiding them through design patterns and code modularity to build scalable applications

Analytics United, LLC

June 2023 - September 2023

Data and Technology Intern

Acton, MA

- Analyzed supply chain and inventory with the GHRA framework, optimized delivery scheduling workflows through Oracle SQL stored procedures

EXTRACURRICULARS

PyTorch Autograd Personal Project

December 2024 - February 2025

- Simulated PyTorch's autograd through implementing a custom automatic differentiation engine
- Built a multilayer perceptron and convolutional neural network to recognize MNIST digits

EG1004: Gunter Georgi Award

September 2022 - January 2023

- NYU Tandon Gunter Georgi award for outstanding engineering design: Created the software for ChessBot, a voice controlled chessboard, using python-chess and Google speech recognition

SKILLS

- **Technologies:** Python, Java, C++, Git, $\text{\LaTeX}$, PL/SQL, ElasticSearch, MongoDB, Docker, PyTorch
