Education

New York University – GPA 3.9

Sep 2022 - May 2026

B.S. Computer Science, Minor in Mathematics

New York, NY

- One of 22 GLASS Scholars, awarded \$10K/year for research, conferences, and global initiatives
- Coursework: Operating Systems, Advanced Algorithms, Algorithmic Machine Learning

Experience

Qualcomm

May 2025 – Aug 2025

Software Engineer Intern

San Diego, CA

- Built a multithreaded asynchronous C/C++ server and client to trigger subsystem restarts (SSR) for stability testing on Android, improving on previous designs and enabling complex testing scenarios
- Implemented systems level programming, cross-compilation, and client-server architecture in a production testing environment
- Developed an Android application in Kotlin to issue SSR, integrating frontend and backend components

Cisco Systems

May 2024 – Aug 2024

Software Engineer Intern

San Jose, CA

- Developed REST APIs using FastAPI, MongoDB, and Elasticsearch to query crash data, performance metrics, and hardware fixes for enterprise customers
- Designed a caching workflow for query results, integrating with Cisco's internal Download API to improve cross team access to risk mitigation data
- Achieved comprehensive test coverage with pytest, improving reliability of deployed features

NYU Theoretical CS Group

Feb 2025 – Present

Research Assistant – Prof. Lisa Hellerstein

New York, NY

- Proved the round robin algorithm achieves a $2d$ approximation for the representation problem
- Applied approximation techniques including dual greedy methods, linear programming, round robin scheduling, and latency-based analysis
- Simulated graph connectivity through implementing dp algorithms and

New York University

Feb 2023 – Dec 2024

Teaching Assistant – Python DSA, C++ OOP

New York, NY

- Guided 40+ students in applying data structures and algorithmic techniques for computational problems
- Taught OOP principles, design patterns, and modular architecture to build scalable applications

New York University

August 2022 – Present

Competitive Programming Club Captain

New York, NY

- Established the Competitive Programming Club as an official NYU organization in Fall 2024 and expanded membership to over 1,000 students
- Developed and taught the introductory track, delivering weekly lessons on core concepts such as dynamic programming, sliding window techniques, and graph algorithms to 25+ students
- Coordinated the annual Spring programming competition with 50+ participants

Skills

- **Technologies:** Python, C++, C, Git, $\text{\LaTeX}$, PL/SQL, Elasticsearch, MongoDB, Docker, PyTorch, Kotlin, Java
